

Pioneering PAPERLESS DIGITAL EXAMS

SECURED
SCALABLE
COST-EFFECTIVE

THINNER THAN AN ANSWERBOOKLET

Littlemore Innovation Labs Pte Ltd., a Singapore-headquartered company established in 2013, has been revolutionising traditional paper-based examinations in Colleges and Deemed/Autonomous Universities across India and other parts of the world through the application of disruptive technology-driven innovation.

Designed in-house, our proprietary hardware, “DigiTaal,” is a dedicated device specifically designed for students taking exams at a graduate level. This device addresses various challenges associated with conventional paper-based exams. In addition to DigiTaal, our integrated solutions platform, LMEExams, is used for administering exams through a choice of options and modules, offering a complete Exams Administration Platform.

DigiTaal allows students to take their exams in a manner similar to writing on paper, along with an inclusion of a variety of digital tools enriching their exam-taking process. This approach combines the familiarity of traditional methods with the advantages of modern technology, providing an elevated writing experience.
